Appendix 1: Our strategic plan

Our Executive team has reviewed our existing strategic plan (page 19) and confirmed the actions, measures and targets remain relevant and current. This includes the 2018-2019 activities highlighted throughout this report.

As we are entering the fourth year of our 5-year strategic plan we will start focusing on a new strategic plan in the next 12-months. We will review our desired outcomes and strategic direction, ensuring our strategies and actions are relevant and contemporary.

Accountability is traditionally established when Parliament confers responsibility on public sector entities to account through a Minister of the Crown for all that is done in the exercise of their authority, the manner in which it is done and the ends sought to be achieved.

Across government benchmarking audits (AGBA) build on the annual assurance audits and are aimed at providing an indication to Parliament and entity management of how entities are performing relative to each other on selected key control activities.

Annual Report on State Finances is a report prepared in accordance with the Government Financial Responsibility Act 2000 that provides the State’s whole-of-government financial results for the financial year and outlines material differences between these results and the financial forecasts contained in the State Budget for that financial year.

Assurance audit or financial audit is audit work performed to enable an opinion to be expressed on the financial statements of a State or local government entity. For State government entities, it also includes audit work to enable an opinion to be expressed on their controls and key performance indicators.

Audit includes to examine, investigate, inspect and review.

Auditor General’s report is the vehicle used to report to Parliament the results of audits and examinations conducted under sections 12 to 20 of the Auditor General Act 2006.

Broad scope performance audits focus primarily on the effective management and operations of State and local government programs and activities.

Clear audit opinion is expressed when the audit concludes, based on the audit evidence obtained, that, in all material respects, the financial statements are free from material misstatement and, if necessary, the key performance indicators are relevant and appropriate and fairly represent indicated performance, or controls are adequate.

Compliance audits are audits that provide information about entity compliance with legislation, public sector policies and good practice.

Corporatised entities operate under enabling legislation in a similar manner to companies under the Corporations Act 2001.

Department means a department of the public sector established under the Public Sector Management Act 1994.

Effectiveness indicators are key performance indicators that provide information on the extent to which entity level government desired outcomes have been achieved, or contributed to, through the delivery of services.

Efficiency indicators are key performance indicators that generally relate services to the level of resource inputs required to deliver them.

Financial statements are a structured set of financial information including explanatory notes derived from accounting records to communicate for a period of time an entity’s financial performance and cash flows, and at a point of time its financial position, that is useful to a wide range of users in making economic decisions.

Focus area audit are audits which assess how well public sector entities perform common business practices and related controls. They are carried out as an extension of our annual financial audits.

A follow-up audit reviews the extent to which recommendations from a previous performance audit have been implemented, generally 3 to 5 years after tabling a report.
A follow-on audit examines the progress in implementing recommendations from a previous report and has additional scope in covering significant issues or developments in the area or activity.

Key performance indicator (KPI) is information about critical or material aspects of service performance or outcome achievement.

Key performance indicator audit is an audit performed to enable an opinion to be expressed about whether or not the key performance indicators are relevant and appropriate having regard to their purpose and fairly represent indicated performance.

A local government entity (LG entity) is one of the 139 local governments or 9 regional councils in Western Australia.

Management letter is a letter to senior management of an entity that conveys the audit findings and results of an audit. It may include recommendations for improvements in controls and other matters.

Matters of significance (MoS) are the ‘key messages’ in Auditor General’s reports defined as the issues a general parliamentary reader would take away from the report after the detail of specific findings and recommendations has receded into the background.

Narrow scope performance audit focus on entity compliance with legislation, public sector policies and accepted good practice across state and local government entities.

Outcomes are the effect, impact, result on or consequence for the community, environment or target clients of government services.

Performance audits are audits that examine efficiency and effectiveness of public sector entities.

Public sector entities is the collective term for all Western Australian State and local government entities.

Service means the supply of an activity or good to a user external to the entity providing the service. Services comprise programs and outputs.

A State government entity (state entity) is a Western Australian government department or agency, parliamentary department, statutory authority, university or state training provider, superannuation fund, corporatised entity, cemetery board or subsidiary entity.

Statutory authority means a person or body specified in Schedule 1 of the Financial Management Act 2006. These entities are established by Parliament under legislation for specified purposes.

Treasurer’s Instructions (TI) are prescribed requirements at a minimum level with respect to matters of financial administration that have the force of law and must be observed by State government entities under the Financial Management Act 2006.
